

## Prints, Albums & Extras

A lot of people ask, "How do photographers come up with their pricing for prints & albums?" Well, a lot of factors play into it. First, when you order a print or album from us, we spend literally hours retouching your selected photos. Small details are enhanced, while other distractions are taken out. Albums are completely customized (not created from a template) so your finished product is as unique as you are! Each photo is given a lot of 'tender loving care' before it gets printed. Next, we only use professional print labs - their printing machines are calibrated to our computer so we know that the colours and sharpness of each picture will be exactly to our specifications. Plus, their printing papers are far superior to those from consumer photo labs. Meaning your photos are guaranteed to last years longer, and stay as bright and vivid as the day they were printed.

### Fully Retouched & Creatively Enhanced Prints:

All prints are available in matte, glossy, or metallic papers. We do not offer 4x6 or 5x7 prints at this time.
